Address: 2nd Floor Bloukrans Building, Lynnwood Bridge, 4 Daventry Road, Lynnwood Manor, Pretoria.

The following principles must be followed in the planning, configuration, procurement and management of office space for WRC:

- **FIT:** Care must be taken to ensure that there is a good fit between the Division, its functions, and the office accommodation. Divisions have specific needs and characteristics such as size, work patterns, change, and internal and external relationships that must be matched with physical aspects of accommodation, layout, servicing, and location.
- **OFFICE CONFIGURATION:** Configuration of offices must advocate and promote optimal use of available space. This will ensure optimal optimisation of space and ensure the best possible functionality within the available space.
- STANDARD OF FITTINGS AND FINISHES: WRC office space must represent effective and efficient
 use of government resources. Standards must therefore be reasonable and supportive of productive
 work, but not ostentatious or wasteful. Finishes and fittings must not be luxurious and must be durable
 and easily maintainable.
- ENVIRONMENTAL QUALITY: Space must provide good levels of occupant comfort and health. This includes good daylighting (30% of lighting levels to be provided by natural light); external views; low energy consumption (20% of energy to be provided by renewable resources); acceptable indoor air quality and reasonable thermal (20-24°C) and acoustic conditions. In achieving these conditions users should be provided with appropriate means to control.
- **LIFECYCLE COSTS:** The operational costs of maintaining space, such as maintenance, and energy costs must be carefully considered and where appropriate, minimised.
- INCLUSION: All offices used by the government must be inclusive. This requires office layouts, procurement, and management processes to comply with environmental standards that enable a wide diversity of people to visit and work in the building comfortably including people with disabilities.
- HEALTH AND SAFETY: Accommodation used by the government must be fully compliant with the
 Occupational Health and Safety Act and all current building regulations. Consideration must also be
 made of the likely future legislative trends, such as increasingly stringent access for people living with
 disabilities and water and energy consumption standards.
- **SERVICE DELIVERY:** Where an office building has a component that is open to the general public, care must be taken to ensure that appropriate environmental and service standards are maintained. Guidance provided in the Batho Pele policy must be followed.
- FUNCTIONAL PROGRAM: A detailed statement describing what is needed by a department to perform
 its activities efficiently, safely, and comfortably. It includes a description about the occupant group's
 requirements for each workstation, support, circulation and special purpose spaces, based upon the
 approved space standards and guidelines. It also describes how the areas relate to each other
 functionally and may describe the type and size of furniture and equipment that needs to be
 accommodated. Afunctional program is used by a designer to complete a space layout.
- PROPOSED SPACE ALLOCATION: A set of prescribed maximum space allocations that must be
 followed when planning office space. Standards do not establish or imply minimum space entitlement
 and consideration should be given by Divisions to meet their requirements using less space.
