

Co-creation of knowledge

- “TD” science, social science
stakeholders, community, users
agency, managers,
decision-makers

Some useful steps

- Building a trans-disciplinary team
 - secure project funding
 - balance opportunity and planning in team composition
 - read and share key relevant specialist literature read and share epistemologies (theory – knowledge & understanding) and methods: TD, complexity, integration, resilience, social learning

Steps that require development

- define & develop a shared epistemology (theory, understanding of knowledge)
- engage in developing a shared understanding of quality
- develop a shared language
- define and develop methodologies
- practice reflexivity and modesty
